

Our Promise

- **Convenience**
Through SCE, we can help you find relevant expertise in Singapore, be it from the 15 ministries and over 60 statutory boards, or otherwise. SCE can tap into its proprietary database of experts, including those who have first hand experience in Singapore's development. In short, we are your convenient single window to Singapore's wealth of expertise.
- **Credibility**
SCE's mission has the strong support of our country's leaders. We are mindful that our work affects Singapore's reputation. So, at all times, we will work hand in hand with our solution providers to deliver high quality work. If private sector players are to be engaged, we will pre-qualify them to ensure that they are credible and responsible.
- **Client-focus**
SCE adopts a personal and customised approach. Our work does not stop when the project is done. Instead, we aim to develop close ties with our foreign partners so that we can continuously be of service when required.
- **Connectivity**
Through our networks in and outside of Singapore, we will be able to connect people and organisations. For example, we work closely with inter-government organisations such as the Asia Development Bank and the World Bank who share our interest in promoting development, and can provide complementary expertise and financing solutions for our projects.
- **Competence**
As the saying goes, "IMPLEMENTATION IS POLICY". SCE can put together teams of experts who are able to go beyond giving advice on paper. Drawing upon what has been and is being done in Singapore, we can work closely with foreign partners to implement practical solutions in their countries and to transfer relevant knowledge.
